

## Calculating Generations for Historical Lifetimes

Simply add the age of the client to the appropriate range of years:

- 1<sup>st</sup> generation, 20-25 years (2 parents)
- 2<sup>nd</sup> generation, 40-50 years (4 grandparents)
- 3<sup>rd</sup> generation, 60-75 years (8 great-grandparents)
- 4<sup>th</sup> generation, 80-100 years (16 great-great-grandparents)
- 5<sup>th</sup> generation, 100-125 years (32 third great-grandparents)
- 6<sup>th</sup> generation, 120-150 years (64 fourth great-grandparents)
- 7<sup>th</sup> generation, 140-175 years (128 fifth great-grandparents)
- 8<sup>th</sup> generation, 160-200 years (256 sixth great-grandparents)
- 9<sup>th</sup> generation, 180-225 years (512 seventh great-grandparents)
- 10<sup>th</sup> generation, 200-250 years (1,024 eighth great-grandparents)
- 11<sup>th</sup> generation, 220-275 years (2,048 ninth great-grandparents)
- 12<sup>th</sup> generation, 240 – 300 years (4,096 tenth great-grandparents)
